

Online Ticket Management (OTM) allows for tracking ticket redemption at the door or merchandise pick up from the school

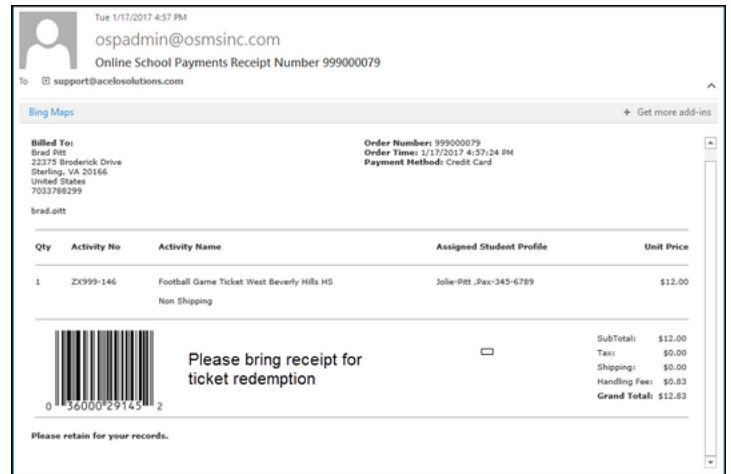

Features and Functionality

With the Online Ticket Management (OTM) module, purchasing school items that require redemption is easier than ever before!

Examples of where schools might want to use ticket redemption include:

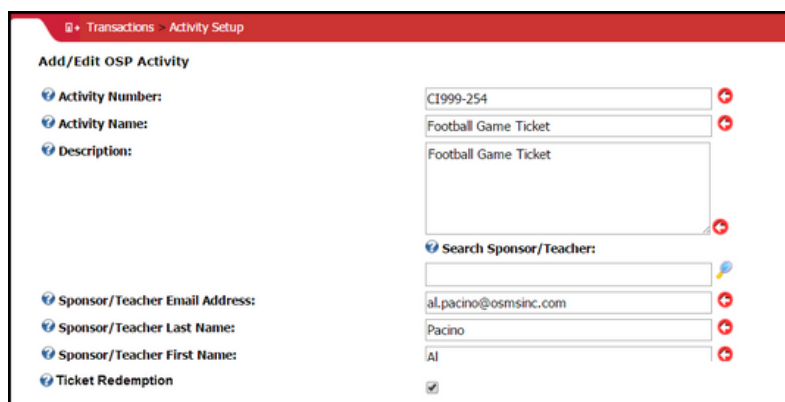

- Athletic Events, like Football
- Musical Performances
- Dances and Student Events
- Merchandise Pickup
- Student Technology Programs
- Theatrical Productions

Purchases made through Online School Payments (OSP) and Online Teacher Receipting (OTR) will now come with a barcode on the receipt. This barcoded receipt can be printed by the customer or displayed on their smartphone for use at the event or item pick up.

To enable barcode printing, the product is simply marked for ticket redemption on the initial setup by the school bookkeeper or authorized user in the Management Portal,

Tickets can only redeemed one time. Attempts to redeem a second time result in an error message. This means that if you are allowing access to events such as football games or prom, it's truly a "one ticket to one person" setup.
